**CANINE SURGERY and DENTAL
CONSENT FORM**

PRE-ANESTHETIC BLOOD TESTS

Your pet is with us for a procedure that will require a sedative and/or anesthesia. We always **recommend** a pre-op blood profile to check for adequate numbers of blood cells and to check proper function of the kidneys and liver that may not be evident on a physical examination. The testing is **REQUIRED** for animals 7 years old or older. (\$52.94)

- YES Please complete pre-op blood tests
- NO I DECLINE pre-op blood testing (OR blood work has been done). Perform the procedure.

SEVOFLO ANESTHESIA

Currently we use Isoflurane anesthesia, an anesthetic with an excellent safety record. You may elect Sevoflo anesthesia for your pet. It is an anesthetic we now carry that is utilized for 95% of all human pediatric procedures in the US, which allows for rapid and smooth induction and recovery with no "anesthesia hangover". There is an additional cost of \$1.00 per minute of anesthesia time above the normal anesthesia charge.

- Please use the doctors discretion on the choice of anesthesia that is appropriate for my pet's procedure and I agree to pay the additional charges
- YES I authorize the use of Sevoflo if it is appropriate in my pets procedure and agree to pay the additional charge as above.
- NO I prefer the use of the standard Isoflurane anesthesia

IV CATHETER AND INTRAVENOUS FLUIDS

Companion Animal Hospital recommends an IV catheter and fluids. The fluids maintain your pet's blood pressure which is very important especially during anesthetic procedures. Also, fluids provide internal organ support (especially kidney function) by increasing blood flow to the kidney improving the tolerance of the anesthetic agents and the procedure performance. \$66.74

- YES, please place an iv catheter
- NO, I decline the placement of an IV catheter

PAIN/COMFORT MEDICATION

Pain medications are administered to all surgical patients. The cost of pain medications for elective procedures will vary from \$25.00-\$45.00, in addition to the surgical fee, depending on the size of the patient and the medications used.

DENTAL PROCEDURES

Occasionally intraoral radiography, tooth extraction, or repair is necessary due to advanced periodontal disease or severe damage to a tooth as a result of trauma or cavities. An additional fee would be incurred for these procedures. If you would like to be called to discuss any necessary extractions or repairs, please let us know now, and leave us a number where you can be reached.

Do you authorize tooth extraction(s) or repair without contacting you first? YES NO* PHONE# _____

Pain medications and Antibiotics may be administered with extractions. Prices range from \$35.00 - \$45.00 in addition to the surgical fee.

*If we cannot contact you regarding medically necessary extractions or fillings, then a second procedure will need to be scheduled to perform these procedures

RECOMMENDED TESTS

FECAL TEST

- YES Please provide a fecal examination for my pet. I understand there is a charge of \$23.50 for this test.

CANINE HEARTWORM TEST: For dogs older than 6 months, and born prior to last October. For adult dogs that have not been tested within the past year.

- YES Please test my dog for Heartworm. I understand there is a charge of \$41.90 for the test.

VACCINES

We require that all pets are current on their Rabies vaccination and Distemper vaccination. (Cost: Rabies \$18.50 and DHLPP/PV \$21.50)

There will be an exam charge if vaccines are given (Cost: \$49.00)

YES, please administer only the following that are checked: DISTEMPER RABIES KENNEL COUGH LEPTO

*Occasionally, a pet can have a reaction to the vaccines. The reaction can be as mild as a few hours of being a bit lethargic to, in very rare cases, death from anaphylactic shock. It is impossible to predict which pets are prone to vaccine reactions; however, every effort will be made to treat your pet, should a reaction occur. **If you are aware of your pet having had a reaction in the past, please let the doctor know so that precautions can be taken.**

PERMANENT IDENTIFICATION

We can implant a micro-chip on your pet for an ID that can't get lost! This simple procedure can be performed while your pet is here today. The cost for the surgical implantation of the chip is \$64.27.

Does your pet have a microchip? Yes ___ No ___ Would you like a micro-chip implanted today? Yes ___ No ___

I hereby certify that I have read and fully understand this authorization for treatment. I am the owner or agent for the above described animal and have the authority to execute this consent. I assume financial responsibility for all charges incurred to the above patient and agree to pay all such charges when the animal is released from the hospital. I understand that in the event of an emergency my pet will have treatment provided at my cost and I will be contacted as soon as possible. I understand that any procedure, especially anesthesia, involves some risks and that results cannot be guaranteed. I understand that if the animal is not current on the combination of distemper and rabies vaccinations, this will be done upon hospitalization and added to the cost of the above procedure(s).
